Santo Cilantro Sativum

- Plant in Sun (at least 6 hrs of sun)
- Space 12-18" (30-46cm) apart
- Grows 12-24" (30-61cm) tall by 12-18" (30-46cm) wide
- Pinch back young plants an inch or so to encourage fuller, bushier plants. Snip off the top part of the main stem as soon as it appears to be developing flower buds or seedpods. Cilantro has a short life cycle and bolts quickly (develops seed) in hot weather. Once it sets seeds, the plant quickly starts to degrade.

(Cut along dotted line for standard bench card size.)
