

Bush Champion Cucumber

- Plant in Sun  (at least 6 hrs of sun)

- Space 12" (30cm) apart

- Grows 8-10" (20-25cm) tall by 24-36" (61-91cm) wide

- Since cucumbers love heat, they can follow cool-season crops, like spinach and lettuce.

The use of mulch can speed up growth by conserving soil moisture, maintaining a high soil temperature. Water deeply once a week, applying at least one inch of water.

Apply an all-purpose, vegetable garden fertilizer when your plant begins to set fruit.

When planning the garden, consider

growing cucumbers vertically on a
trellis, fence or other support.

(Cut along dotted line for standard bench card size.)
