

Thunderbolt Pepper

- Plant in Sun 🌞 (at least 6 hrs of sun)
- Space 24-30" (61-76cm) apart
- Grows 40-45" (102-114cm) tall by 35-40" (89-102cm) wide
- Water in moderation; the soil must drain well.
Peppers don't tolerate saturated soil that waterlogs their roots.
Don't overfertilize.
Use mulch to prevent excessive evaporation from the soil during the dry Summer months.
For support, loosely tie the plants to stakes using rubber bands to allow for the expansion that comes with growing.

(Cut along dotted line for standard bench card size.)
