

Snow Crown Cauliflower

- Plant in Sun  (at least 6 hrs of sun)

- Space 24" (61cm) apart

- Grows 12-18" (30-46cm) tall by 18-24" (46-61cm) wide

- Grows best in rich, well-drained soil. Keep soil cool and moist. Cauliflower heads must be shaded from the sun to maintain their color. Tie up loose leaves over the center of the plant to protect it from sunburn and create your own shade. Use rubber bands instead of string to allow for the expansion that comes with growing.

(Cut along dotted line for standard bench card size.)
